

MAN OVERBOARD RECOVERY

RESCUE NET

A ready-to-deploy net for recovering a person from the water. Its stabilising frame supports a conscious or unconscious casualty while one crew member uses the retrieval ropes to bring them aboard.

1 PERSON

designed for deployment

5 SIZES

vessel configurations

3-7 FT

freeboard range

TECHNICAL DETAILS

FIT

Five configurations; freeboards 3-7 ft

VESSEL RANGE

Under 40 ft to over 60 ft

NET MATERIAL

Marine-grade polyamide hawsers

HARDWARE

Half-ton rated electro-galvanised snap hooks

RECOVERY

Supports conscious or unconscious casualties

SERVICE LIFE

Minimum four years with correct care

HOW IT WORKS

01 / DEPLOY

Lower the net beside the casualty.

02 / POSITION

Guide the person into the suspended net.

03 / RECOVER

Pull the ropes to roll the supported person aboard.

ON THE WATER

Select the net to match your vessel length and freeboard. Designed for compact stowage, prompt deployment and rinse-and-dry maintenance.

Crew training, inspection and suitable vessel attachment remain essential.
